Software Developer

DEF Corp

📅 2015 - 2017 📍 New York, NY

- Developed desktop applications using MFC and Win32 API, resulting in a 25% increase in user satisfaction.
- Implemented multi-threading and parallel processing techniques, resulting in a 30% improvement in application performance.
- Developed software for finance and healthcare industries, resulting in a 15% increase in revenue.

PROGRAMMING LANGUAGES

Java

C++

CORE COMPETENCIES

Java & Spring Boot Development

Building and maintaining scalable backend services and APIs.

RESTful API Design & Integration

Delivering secure, high-performance APIs for cross-platform systems.

Front-End Development

React, Angular, JavaScript, HTML5, CSS3 for responsive, user-friendly interfaces.

Database Management

Expertise in SQL/NoSQL databases with performance optimization.

Cloud & DevOps

AWS, Docker, Kubernetes, CI/CD pipelines for reliable deployments.

Agile Collaboration

Cross-functional teamwork, sprint planning, and code reviews.
